

Orthopedic Foundation for Animals (OFA) screening, especially for breeds prone to orthopedic issues. OFA screening is a valuable tool in assessing the risk of hip dysplasia, elbow dysplasia, and other related conditions. This proactive approach can help us manage or even prevent the development of these conditions, ensuring a better quality of life for your pet. Our clinic offers comprehensive screening services, including X-rays and expert evaluations. This process is crucial for breeding decisions, surgical planning, or simply for peace of mind regarding your beloved pet's orthopedic health. To schedule your OFA screening appointment or to discuss any concerns you may have, please feel free to contact us at your convenience.
